## Needed Materials

Association Flashcards

## How To Play

Sit down at a table with your child. Place all the cards on the table face up. Then, decide which cards go together best.

If this is overwhelming for your child, take one card and show it to your child. Have your child name the picture. Then pick out 2 or 3 more cards with the right answer mixed in. Have your child decide which picture goes best with the original picture.

Sometimes just having a few choices helps some children focus better.
