# Treasure Hunt

## Needed Materials

Small Treasure (i.e., candy, ball, stickers, figurine)

## How To Play

The "hider" hides an agreed upon treasure somewhere in the house. Once hidden, the "hider" gives directions to the "seeker(s)" to help find the treasure.

When giving your child directions to find a treasure, add some "silly directions" into the mix that have nothing to do with finding the treasure but that are good listening practice. For example, you might tell your child "touch your nose and jump up and down. Walk to the couch and sit on it. Next, stand up and touch the front door. Now, spin around and then look under the doormat. You found the stickers!"

## Tips

- Have fun! Remember that is playtime!
- Start with one step directions and move up to 2 step directions.
- Add some time concepts such as first and next for good practice.
- Make sure your directions contain age appropriate vocabulary.
- Take turns with your child being the hider. It will be good expressive language practice to have your child give clues!
