

Name: _____

Date: _____

How To Say N

Below is a brief explanation on what all the articulators (tongue, lips, teeth, jaw, breath, voice) must do to say /n/correctly.

Lips: Lips are in a neutral position (not rounded) with a slight gap

Tongue: The tongue tip presses against the alveolar ridge (the bumpy part on the roof of mouth behind the top teeth)

Teeth: They are relaxed in a resting position

Jaw: The jaw is up and centered

Breath: /N/ is a nasal sound which means the air escapes through the nose. Say /n/ while touching your nose. You should feel a vibration!

Voice: /N/ is a voiced sound so the voice box is turned on
