How To Say P

Below is a brief explanation on what all the articulators (tongue, lips, teeth, jaw, breath, voice) must do to say /p/correctly.

Lips: Lips are slightly pressed together (enough not to let air escape but not too much where it feels unnatural)

Tongue: It is relaxed in a neutral position

Teeth: They are relaxed in a resting position

Jaw: The jaw is up and centered

Breath: /P/ is a plosive sound which means the breath bursts out of the mouth upon sound production

Voice: /P /is a not voiced sound which means the voice box is turned off
