

Name: _____

Date: _____

J Cues

Speech therapists use a variety of cues during therapy including tactile (touch), verbal (words), and visual (visual models/mirrors) to elicit a correct sound production. Below are the most useful cues for /j/.

Visual

1. Pretend to sneeze and say "ajoo" instead of "achoo"
2. Clap one hand on the other to help encourage your child to say /j/ loud and short

Verbal

1. Say "tongue up"
2. Say "good /j/ sound"
3. Say "turn voice box on"
4. Say "pucker"

Tactile

1. Gently press up behind your child's chin to raise tongue up
