Short Story

Directions: Have your child read the story below. If your child can't read, read the story and then ask your child questions. Don't forget to practice /r/ with each response.

Chemistry Class

Ms. Richards is an excellent chemistry teacher. Her class is always ready to learn. Today is Friday and all the boys and girls are sitting in their chairs at their table. On Fridays, the children get to do a new experiment and it is really fun.

Ms. Richards writes and draws on the blackboard to help explain all the new information. The children listen really carefully. Rory, has a question about how to make the bubbles so he raises his hand. Ms. Richards answers Rory's question. She explains how the reaction works and then tells the class that they will now be able to do the experiment themselves!

They all gather around the tables in the back and listen to their teacher's instructions. They are super excited to get started and make a really cool reaction. Chemistry class is a lot of fun!
