Associations

What are associations? Associations are how words or objects go together. Associations are important for vocabulary development since they relate new concepts with existing vocabulary.

Example: "What goes with a toothbrush?" toothpaste, water, floss (categories-brushing teeth) or soap, shampoo (function-to clean)

Daily Activity To Practice Associations:

Instructions: Name what words go with another word

Name what objects go with another object

Name what word goes with another word AND explain why

Please fill out the log below. Make a checkmark every time your child practices.
