## Short Story

**Directions:** Have your child read the story below. If your child can't read, read the story and then ask your child questions. Don't forget to practice "th" with each response.

### Brushing Teeth

Brushing your teeth is extremely important for your health. First, find your toothpaste and your toothbrush. Squeeze some toothpaste onto your toothbrush. Next, turn on the faucet and get the toothbrush a little wet.

Now, brush your teeth for at least thirty seconds. Make sure to brush your top and bottom teeth and your tongue. After thirty seconds, spit out the toothpaste. If your teeth still feel dirty, repeat the whole thing! If your teeth are clean, rinse your mouth.

It is time to floss! Get a piece of floss and wrap it around one finger from each hand besides your thumb. Move the floss between each tooth. Make sure to floss the top and bottom teeth.

Now, you are done! Your mouth and teeth will thank you if you brush your teeth two times per day.
