What/What Doing Questions Drill Practice

Needed Materials

What Question Flashcards, What Doing Flashcards

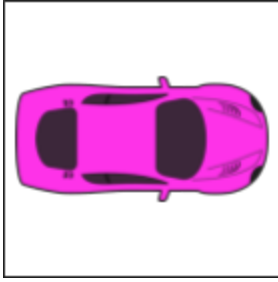

How To Use Cards

1. Print the cards or pull them up on some sort of device (computer, tablet, iPad, etc...).
2. Sit down at a table with your child and get out the cards.
3. Ask the question “what is this” or “what is (person/animal) doing” and then answer your **own** question. Have your child repeat your answer. Do this for a few rounds so your child starts to learn how to answer what questions.
4. Once, your child has learned the pattern, ask him/her a question and wait for a response. If your child answers correctly, say good job and move on to the next card. If your child makes a mistake, correct the mistake and have him or her repeat it and then move on.
